1.1 Question

- i have tried to include chatGPT, and explaind where in the code i have used it.
- I have added one more example of colour representation, and i have written the motivation for the different choices
- added a recursive data structure
- added a solution to the problem 2.d, and made the specifications clear and specifications are given for all relevant functions
- for 3.a - added an `../Data/` to the datafile so it can run the python program in the terminal, and added the specifications as a docstrings for the functions
- Defined the programming paradigms for 3.b, and arguments about the programming paradigms
- in 3.c i have done the same as in 3.a with the data file so it can run in the terminal, and i have added input partition for testing
- 4.a i havde done the same with the datafile so it can run in the terminal
- 4.b change the programming paradigms, and arguing about the benefits
- 4.c , change the datafile so it will run in terminal, and added input partition as testing.
- 4.d Roles of variables are properly defined
